

Track and find any vehicle in your inventory.

goDit helps your dealership run more efficiently!

Improve operations with goDit.

Instantly locate any vehicle on your lot for improved efficiency and customer experience.

Control inventory aging with real time tracking and reporting.

Track the correlation between advertising spend, test drives and unit sales. **Supercharge your VDPs.**

Report on test drive activity by date, time, sales person, and vehicle information.

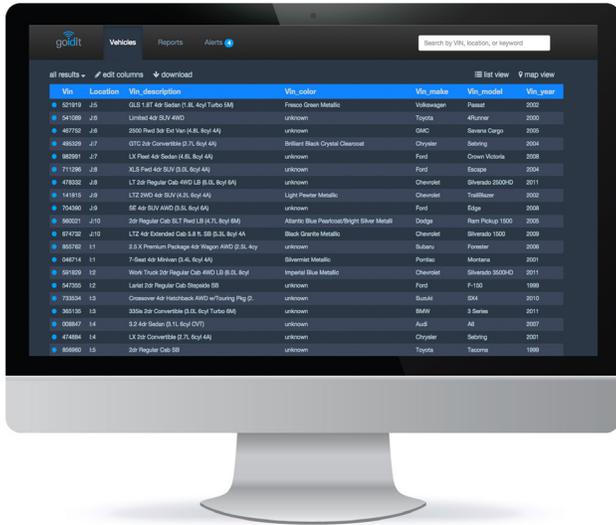

Continuously audit inventory for improved control, visibility and compliance.

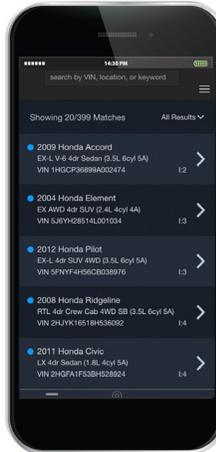

goDit plugs right into the standard On-Board Diagnostic Port (OBD-II) of the vehicle, powers itself through this connection, and automatically acquires additional information such as VIN number, make, model, and year.

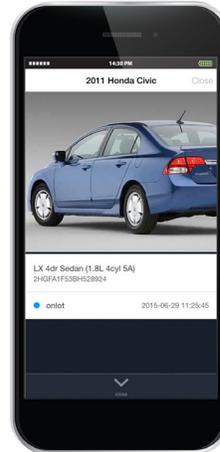

Easy to use, practical, and pays for itself.

View a complete list of your current inventory including current location and status.

Search for vehicles, their location, and history on any mobile device.

Drill down to see more detailed information about a specific vehicle.

Locate a vehicle and zoom in on a map view to see where it currently is on the lot.

Dealerships spend far too much time and labor locating vehicles because they're constantly moving. They may be out for test drives, checked out as loaners, or simply moved to a new location. With the goDit solution you can track and find any vehicle in your inventory. This has a direct impact on your operational costs and improves your management controls and customer service.

goDit is an affordable wireless device that plugs right into the standard On-Board Diagnostic Port (OBD-II) of the vehicle, powers itself through this connection, and automatically acquires additional information such as VIN number, make, model, year. goDit also provides onboard GPS capabilities to securely report its current location via Wi-Fi to our cloud services.

The functionality of goDit can be securely accessed through any connected device and provides instant value to management, sales, finance, and customers. With a quick search users can see exactly where any vehicle is on a map of the dealership. When a customer arrives at the dealership, being able to instantly locate a vehicle that they are interested in has a direct impact on their first impression, their confidence level, and the likelihood of them doing business with you.

goDit provides the data and analytics dealerships need to stay competitive in today's environment. Better data allows management to make informed decisions quicker to impact the operation and financial strength of their dealership.
